

Graduate Scheme

Where Innovation Meets Opportunity.

Giving you the support and tools to make a real difference from day one.

Join Us and Secure the Systems That Keep the Nation Running.

At Logiq, we don't just protect data—we safeguard the most critical assets of the nation. As an NCSC-assured cyber security consultancy and secure managed services provider, we play a vital role in defending highly sensitive systems and information across some of the most heavily regulated sectors, including the Ministry of Defence, Central Government and Civil Nuclear.

Our expertise spans across risk management, security architecture and cloud services, where we specialise in delivering cutting-edge, cyber-secure solutions that enable organisations to stay resilient against evolving threats. Trusted by the MOD to secure mission-critical systems at the highest classifications, we design networks that meet the rigorous standards needed to safeguard the UK's most sensitive information.

As part of Logiq, you'll be joining a team that's at the forefront of cyber security, tackling complex challenges with a modern, forward-thinking approach. Our work helps shape the future of national security, and by improving cyber resilience, we make security the foundation of every business we serve.

Your Career Starts Here. Your Impact Starts **Now**.

Join Logiq's Graduate Scheme and embark on a journey that is more than just a career — it's a chance to shape the future of the industry.

Our two-year Graduate Scheme is designed to give you an immersive and comprehensive introduction to the world of cyber security and IT services.

You will rotate across our core internal practices, giving you hands-on experience in the areas that power our business and protect our clients.

Each rotation is crafted to help you build critical skills, gain real-world insights, and understand how different functions work together to deliver robust solutions.

Why choose Logiq?

Hands-On Experience: You'll dive into real projects from the start, working alongside industry experts to solve some of today's biggest challenges in cyber security.

Mentorship and Growth: Our team will guide you every step of the way, helping you unlock your full potential through personal mentoring and skills development.

Innovation at the Core: We foster a culture of innovation where your ideas matter. You'll have the opportunity to contribute and drive forward-thinking solutions.

Make an Impact: We work with highly regulated sectors including defence and government, meaning your work will have real-world impact, protecting critical national interests.

Career Progression: Our scheme is designed to fast-track your career. Whether you aspire to be a technical expert or a future leader, we'll help you get there with structured career paths and continuous learning opportunities.

What You'll Experience:

Security: Work alongside Logiq's security consultants to identify and address cyber risks, learning the strategies and tools that protect sensitive information in some of the world's most critical sectors.

Architecture: Develop a deep understanding of system design and how we create secure and scalable IT architectures tailored to the needs of government and highly regulated industries.

IT Service Development and Delivery: Participate in the end-to-end process of IT service management, from designing effective solutions to ensuring their smooth delivery to clients.

Internal Security: Learn how we safeguard our own systems, from managing access controls to identifying internal vulnerabilities, ensuring we practice what we preach.

And More: Explore other key areas such as project management, compliance and data analysis, gaining a broad perspective on the various facets of our organisation.

Throughout the programme, you'll be supported by experienced mentors, engage in training sessions tailored to your development and have the opportunity to contribute to live projects that matter.

By the end of the two years, you'll emerge as a well-rounded professional, equipped with the knowledge, skills, and experience needed to pursue a specialised career in cyber security or IT services.

“

The graduate scheme has provided me with the breadth of knowledge and experience to thrive as a well-rounded and informed security consultant, able to juggle business and technical demands to deliver for our clients. I have been able to gain exposure in a variety of fields in cyber yet also specialise and work towards my preferred career path.

- Josh W (2023/25 graduate)

Ambitious, driven individuals who are passionate about cyber security and eager to make an impact — our ideal candidate is not just someone with technical skills, but someone who thrives in a collaborative, fast-paced environment and is ready to embrace challenges head-on.

We are looking for graduates who:

Have a Passion for Cyber Security: You should be keenly interested in cyber security and IT services, with a basic understanding of core disciplines such as network security, data protection or risk management.

Are Eager to Learn: This is a learning journey, and we want individuals who are curious, open to feedback and driven to continuously improve their skills.

Demonstrate Problem-Solving Abilities: Cyber security is about finding innovative solutions to complex challenges, so you'll need a creative and analytical mindset.

Possess Strong Communication Skills: Whether working with a team or engaging with clients, clear and effective communication is key.

Have a Collaborative Spirit: You will be part of a close-knit team, so we're looking for people who enjoy working with others and contributing to a shared mission.

Show Initiative and Resilience: Cyber security is a dynamic field, and you'll need to be proactive, adaptable and ready to take on any challenge that comes your way.

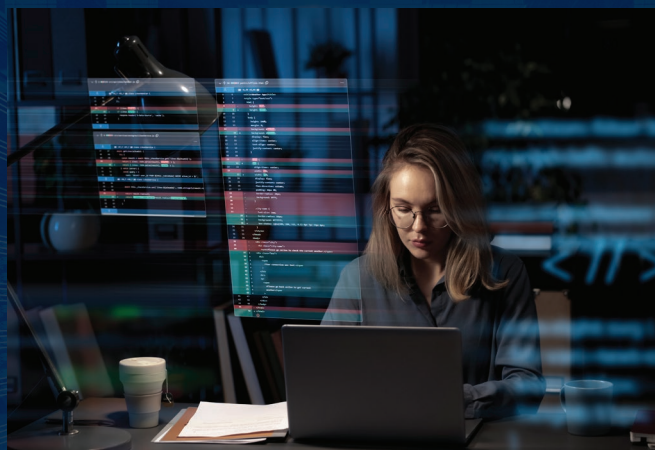

Qualifications:

- A degree in a relevant field such as Computer Science, Cyber Security, IT, Engineering, or another related discipline.
- Knowledge of cyber security principles and practices.
- A desire to work in the public sector and with highly regulated industries.

Career Success
Begins with **Logiq**
